# POLLING ERROR: SEQUENTIAL PIPELINE INTELLIGENCE DOSSIER

Program: Polling Error • Sequential Coordination: PollBot (Stage 1) → StatBot (Stage 2) • Georgian College LIAI 1001

**Coordination:** Sequential Pipeline (PollBot → StatBot)

**Timestamp:** 2026-10-29 23:14:07 UTC

**Dataset:** PollBot Intelligence Transfer

**Reaffirmation:** Confirmed • Non-Repetition: 100%

## STAGE 1: POLLBOT QUALITATIVE METHODOLOGY ANALYSIS (FIRST)

*Synthesized polling intelligence from 3 polls in sample_polls.json*

• National Metric Research: Candidate A 49.2%, Candidate B 47.8%, N=1200 (Likely Voters (LV)), Mode: Live Phone + SMS, MOE: ±2.8%
• Civic Pulse Online: Candidate A 45.1%, Candidate B 52.4%, N=850 (Registered Voters (RV)), Mode: Online Panel, MOE: ±3.4%
• Public Opinion Daily: Candidate A 48.8%, Candidate B 48.1%, N=1100 (Likely Voters (LV)), Mode: Mixed Mode (IVR + Online), MOE: ±3.0%

## STAGE 2: PIPELINE HAND-OFF & USER REAFFIRMATION GATE

**Handoff Status:** VERIFIED • User Reaffirmed: YES

**Transfer ID:** TRANS-20261029-231404

**Ledger Deduplication:** Active (Jaccard ≥ 0.55)

**Payload Integrity:** Immutable Typed Contract

## STAGE 3: STATBOT STATISTICAL CATEGORIZATION (SECOND)

### Category: Demographic Factors

• National Metric Research: Likely Voters (LV) sample frame
• Civic Pulse Online: Registered Voters (RV) sample frame
• Public Opinion Daily: Likely Voters (LV) sample frame
• National Metric Research: N=1200
• Civic Pulse Online: N=850
• Public Opinion Daily: N=1100

### Category: Methodology & Errors

• National Metric Research: Mode = Live Phone + SMS, MOE: ±2.8%
• Civic Pulse Online: Mode = Online Panel, MOE: ±3.4%
• National Metric Research: Candidate A 49.2%, Candidate B 47.8%
• Civic Pulse Online: Candidate A 45.1%, Candidate B 52.4%
• Public Opinion Daily: Candidate A 48.8%, Candidate B 48.1%

### Category: identified_gaps

• Sampling Frame Gap: Opt-in panel weighting models require voter file matching to isolate self-selection and non-response participation skew.

### Identified Statistical Gaps & Cross-Tabulations

• Sampling Frame Gap: Opt-in panel weighting models require voter file matching to isolate self-selection and non-response participation skew.
